Introducing our new charity partner: Breathe March 2025

As part of our programme of reaching new communities that need donations to improve their lives, we are delighted to be partnering with Breathe.

As part of our programme of reaching new communities that need donations to improve their lives, we are delighted to be partnering with Breathe.

Breathe is a social enterprise that specialises in developing creative health programmes based on strong clinical evidence. Transforming People's Lives has funded Breathe's programme for children with hemiplegia, a condition that makes one side of the body weaker than the other. This programme uses magic as a way of helping children to rehabilitate their weaker side so that they can use it for everyday tasks, as well as magic tricks.

Together, Breathe and Transforming People's Lives will be able to change the lives and outcomes for children with hemiplegia. If you would like to donate, please contact us.
